

SunView

Mobile Surveillance App

System Overview

SunView APP, a security camera app both for iPhone and android, enhances security by providing administrators the flexibility to monitor the live video from network cameras and NVRs via wireless network.

With this app you can connect Sunell devices through the network and play live and recorded video, control PTZ cameras, receive alarm notifications, manage devices, and start two-way audio on a mobile device.

Main Function

- Support simultaneously managing network camera and Sunell NVR
- Add device via Auto Search, IP/Domain, P2P and Sunell DDNS
- Support Sunell Cloud Management
- Support scanning QR code to get a remote view via P2P
- Support alarm video push notification
- Support 1/4/9/16 screen layouts
- Support 1/4 screen layouts for up to 4 channels playback
- Support to playback with SD card files and HDD files
- Support image capture/video recording functions
- Remote configuration: User can configure devices on their mobile phone, including time, day/night mode, motion detection, intrusion, line crossing, and recording schedule.
